

## Web Conferencing

**Web Conferencing enables your organisation to communicate more quickly and efficiently. It can liberate your workforce from the time and geographical constraints that limit your ability to get together in person.**

### When Collaboration Really Matters

ellesys can help you save travel time and expenses, improve productivity and get more work done in a shorter time. if you have a telephone and an internet connection, you can hold an online meeting right from your desktop, right now. Enjoy unlimited web conferencing with per participant, per minute pricing that allows you to meet as often as you want, for as long as you need. Simplify by getting one bill, and having one customer support number for both audio and web conferencing.

### Why Web Conference?

Is your organisation looking for ways to communicate more quickly and efficiently? ellesys web conferencing liberates your workforce from the time and geographical constraints that can limit your ability to get together in person.

Powered by Webex, it empowers you to collaborate with customers, partners and colleagues around the world, at any time via web conferencing.

Access all the advanced features of web conferencing including presentation, application and desktop sharing, remote control, video, chat, recording and more.

Leverage fully integrated audio conferencing from ellesys.

### Features

**Share and control documents, applications and desktops** remotely in real time without uploading to a file server. Collaborate on content as you view, annotate and enlarge documents or graphics.

**Give your attendees a real-time visual reference.** Simulate face-to-face meeting with participants from multiple locations with multi-point video.

**Record meetings and applications** for future reference, training or demonstrations.

**Meet with anyone without worrying about what operating system they use.** WebEx offers users unmatched support for Windows, Mac, Linux and Solaris.

**Plan ahead or start an instant meeting.** Invite participants on the fly from within a live web conference.

All online meetings are hosted on a distributed, private, redundant network.
